pureAir 500 Room Purifier \$179.00

Effortlessly purify the air in an individual room with pureAir 500. Using advanced technologies including activated oxygen, ionization, and HEPA carbon filtration, pureAir 500 eliminates bacteria, viruses, odors, smoke, pollen, mold, pet dander, volatile organic compounds (VOCs), and more. These technologies help to sanitize everything in the air, walls, ceilings, floors, furniture, clothing, countertops, and other exposed surfaces.

pureAir 500's operation is just as simple as its design; choose the continuous setting (green) for a constant ionic clean or use the burst setting (blue) with automatically timed activated oxygen to deal with tougher odors. There's even an away setting (red) that deep cleans the air in your room while you're out running errands.
